

aria|mini

Hi-Fi meets art

aria mini is a compact and more affordable music server version of our higher performance aria. Our new aria mini has inherited the genes of its "big brother aria", it incorporates a stand for Tablets, it's fanless, supports an on board capacity up to 2TB and includes a DAC supporting PCM music files up to 32 bits and 384 kHz (DXD), and DSD64/128.

aria mini is compatible with AirPlay™, Google Cast and DLNA™ and, like the original aria, supports extended metadata fields for all music genres and is fully automatic for populating a wealth of classical music detail.

**AUDIOPHILE MUSIC SERVER
POWERFUL APP**

Sometimes dreams come true

- Multizone support
- Fully automatic CD Ripper* (insert & rip), with external DVD
- Best metadata retrieval in the market with auto access to 5 databases
- Bit Perfect digital audio
- Support for up to 32bit/384KHz PCM/DXD music files and DSD 64/128
- Digital (USB) and unbalanced analog RCA outputs
- Compatible with Airplay™, Google Cast, and DLNA™
- Supports storage expansion via external HDD and NAS

Specs

HARDWARE

- Slim all aluminum fanless case
- Custom industrial grade, ultra low-power computer board
- Switch mode Power Supply (external)
- Linear mode Power Supply (Optional)
- Digital Audio Outputs: USB 2.0
- Analog Audio Outputs: 2 x RCA (unbalanced)
- Optional HDD or SSD and DVD-R

DAC

- Sampling frequency: PCM 44.1 to 384kHz, DSD 64 to 128
- PCM resolution: 16 to 32 bits
- Frequency response: 5Hz to 75kHz (fs 384kHz or DSD128)
- DAC: 32Bits- 384 KHz and DSD64/128
- SNR: 106dBA
- THD+N: 0.003%
- Output voltage: 2.0Vrms @ 0DBFS
- Output impedance: 0,5 Ohms
- Clock precision: 10ppm 0°C to 50°C, 2.5ppm typical @ 25°C
- USB link: async, USB 2.0 Audio class compliant

iaria app

UNIQUE IN THE MARKET

Unlimited number of extended metadata fields for any music genre

- Extremely easy-to-use, just open the app and start playing music
- **iaria app** automatically detects any aria server and selects it with no network hassles. Manual entry of NAS name or IP address is also provided
- Available zones with compatible DLNA renderers are identified and can be selected anytime in the zones menu
- Multilanguage GUI support
- Super-fast loading and scrolling of large libraries
- Logical tree views in tile layout supported for all extended metadata fields, that allows a unique and powerful browsing experience through the music library
- Playlists storage in aria server
- Import music (copy to HDD) and libraries from external HDD and NAS
- Deletion of music files
- Automatic playlists creation (top 100, recently played, etc.)
- On-screen tagging tool for all metadata fields
- Audio streaming to the Tablet allows listening to aria's music library on headphones
- Intelligent Search engine showing results sorted by tracks, albums and metadata fields
- Streaming music with Airplay: You can stream the music contained in your Tablet, Spotify, Qobuz, Wimp/Tidal, Deezer, Rapsody, Pandora, Internet radio, etc.
- Streaming to Airplay devices
- Compatible with iOS and Android
