## Main Menu

The main menu is the gateway to your music world. Browse your music, internet radios, streaming services, favorite library, playlist and search your music. Switch your audio input resources. Switch on/off streaming services.

## Playback Menu

You can get all info of the song playing here and control all as you like.

## Local Media Menu

All local media resources will be scanned and displayed here, including music from the memory of your smart device, USB storage plugged into the device and home share in the network.

## Room Control

The devices in all rooms will be listed and controlled here. You can play music in sync or mix different music in different rooms. Volume can be adjusted together or individually. There is also an option to pause all or resume. Setting of each room can be done here, too.

## Device View

All device info will be shown here, function setting including music alarm, sleep timer and password setting for your device.

## Services Display

Menu Switch on/off the music services here.
