

aria|piccolo+

aria piccolo+ has the genes of aria, it's fanless, it has internal HDD/SSD storage and includes an audiophile grade DAC supporting PCM and DSD music both for stereo and multichannel.

aria piccolo+ is compatible with AirPlay™ and DLNA™ and supports multiroom.

aria piccolo+ requires no computer skills to use it, all functionality is performed from the award-winning iaria app for iPad and Android. The app supports extended metadata fields for all music genres and is fully automatic for populating a wealth of classical music detail.

AUDIOPHILE MUSIC SERVER
POWERFUL APP

Sometimes dreams come true

aria | piccolo+

HD MUSIC SERVER - HIGH QUALITY DAC - EASY TO USE - POWERFUL

Features

- Easy to use - just open the app in your tablet and start playing music
- 100% silent operation
- Multizone support
- Fully automatic CD Ripper (insert & rip), with external DVD
- Best metadata retrieval in the market with access to 5 databases
- Bit Perfect digital audio
- Support for up to 32bit/384KHz PCM/DXD music files and DSD256.
- Digital outputs: USB, SPDIF (Coax and AES) and HDMI
- Analog outputs: unbalanced 2 x RCA and balanced 2 x XLR
- Multichannel Support via HDMI and USB outputs.
- Compatible with Airplay™ and DLNA™
- Supports storage expansion via external HDD and NAS
- Support for huge music libraries , +500.000 tracks
- Unified music library for internal and external storage devices

Specs

HARDWARE

- Slim all aluminum fanless case
- Custom industrial grade, ultra low-power computer board
- Low noise shielded switched mode power supply
- Digital Audio Outputs: USB 2.0
- Analog Audio Outputs: 2 x RCA (unbalanced) and 2 x XLR (balanced)
- 3TB HDD or 1TB/2TB SSD, additional capacity can be provided with an external HDD or a NAS.
- The model can also be specified without DAC or with an internal DAC supporting up to 32bits-384KHz and DSD 64/128/256.
- External DVD-R for ripping (optional)

DAC

- Sampling frequency: PCM 44.1 to 384kHz, DSD 64 to 256
- PCM resolution: 16 to 32 bits
- Frequency response: 5Hz to 75kHz (fs 384kHz or DSD256)
- DAC: Burr Brown. 32Bits- 384 KHz and DSD64/128/256
- SNR: 106dBA
- THD+N: 0.003%
- Output voltage: 2.0Vrms @ 0DBFS
- Output impedance: 0,5 Ohms
- Clock precision: 10ppm 0°C to 50°C, 2.5ppm typical @ 25°C
- USB link: async, USB 2.0 Audio class compliant
- Supports a broad range of music formats: WAV, FLAC, Apple Lossless (ALAC), AIFF, AAC, Ogg Vorbis, MP3 and DSD256

Specs

SOFTWARE

RIPPING

- Fully automatic CD Ripper (insert & rip) with external DVD
- Error correction and AccurateRip audio check
- Internet access to premium databases: *GD3, SonataDB* (Classical), *Discogs, Freedb* and *Musicbrainz*
- *PerfectMeta* software picks and merges metadata results from each database to bring you the best metadata results in the industry
- Extended metadata fields support (up to 18) for all music genres: *Composer, Style, Period, Instrument, etc.*, a unique feature, and still a market first, available for any genre with manual tagging
- Fully automatic extended metadata tagging for classical music

PLAY

- Gapless playback
- Play files from memory
- Multizone streaming using UPnP/DLNA compatible renderers
- Play from an external NAS or HDD/SSD
- Play to Tablet and any other compatible device
- Stream any music service from your Tablet
- Play remotely your music library in a PC/MAC or mobile device
- Multichannel support via USB and HDMI

AUDIOPHILE CHARACTERISTICS

- Support for uncompressed (WAV, AIFF) and lossless formats (FLAC, ALAC)
- DXD (32bit/352.8KHz) file Support
- DSD64/128/256 file support
- Bit Perfect support (ASIO, ASIO 2.1, WASAPI and Kernel streaming)

aria app

UNIQUE IN THE MARKET

Unlimited number of extended metadata fields for any music genre
Easy to use, yet extremely powerful

- Just open the app and start playing music
- aria app automatically detects any aria server and selects it with no network hassles. Manual entry of NAS name or IP address is also provided
- Available zones with compatible DLNA renderers are identified and can be selected anytime in the zones menu. Sonos compatible.
- Multilanguage GUI support
- Super-fast loading and scrolling of large libraries (+500,000 tracks)
- Logical tree views in tile layout supported for all extended metadata fields, that allows a unique and powerful browsing experience through the music library
- Artists bios and album booklet support
- Playlists storage in aria server
- Import music (copy to HDD) and libraries from external HDD and NAS into one unified music library
- Automatic backup to an external USB disk
- Deletion of music files
- Automatic playlists creation (top 100, recently played, etc.)
- On-screen tagging tool for all metadata fields. Custom user fields possible.
- Audio streaming to the Tablet allows listening to aria's music library on headphones
- Intelligent Search engine showing results sorted by tracks, albums and metadata fields
- Streaming music with Airplay: You can stream the music contained in your Tablet, *Spotify, Apple, Qobuz, Tidal, Deezer, Pandora, Internet radio, etc.*
- Streaming to Airplay devices
- Compatible with iOS and Android
